Don't forget to visit *The Wedding Registry* at *Luradell*
where you can sip Champagne, and register for wedding day accoutrements.

Frosting Terms . . .

There are special terms to describe the wonderful variety of frostings we use to make the kinds of amazing wedding-day creations featured at a Stroudsmoor celebration. Here are a few of the sweetest finishes . . .

Whipped Cream is the preferred finish for all Stroudsmoor Cakes. A quality non-dairy whipped cream – low in cholesterol and fat – is used to frost the entire cake creating a creamy white appearance, smooth texture and not-too-sweet flavor. This frosting is able to be displayed prominently for 3 to 4 hours and is included at no additional cost.

Mousse Frosting made of non-dairy whipped cream flavored with milk chocolate or raspberry – can be used to ice the entire cake or as accents. The color is ecru (light brown) or pale pink and the taste is semi-sweet with overtones of chocolate or raspberry.

- 3-layer Cake - \$200.00
- 4-layer Cake - \$350.00

Buttercream made with real butter is a smooth, creamy mix of butter, sugar and eggs that may be used to frost the entire cake or just for piping borders and decorations. It has a silky texture and a sweet taste. It can be infused with colors and/or flavors like vanilla, chocolate, lemon, espresso, coconut or hazelnut. Buttercream frosting has a naturally buttery yellow color and is not recommended for a warm-weather wedding.

- Classic Buttercream – no added flavor natural butter color – 3-layer \$300.00 or \$400.00 for 4-layer cake
- Infused with color add - \$150.00 to 3-layer or \$200.00 for 4-layer cake
- Infused with flavor add - \$150.00 to 3-layer or \$200.00 for 4-layer cake
- Infused with flavor and color add - \$300.00 to 3-layer or \$400.00 for 4-layer cake

Shortening Buttercream has the same smooth, creamy texture of Classic Buttercream, but it is a non-dairy mix of Confectioners sugar and shortening – contains no butter, white sugar or eggs. It can be used to ice the entire cake and comes in vanilla or chocolate flavors. Again, Shortening Buttercream is not recommended for warm-weather.

- 3-layer Cake - \$200.00
- 4-layer Cake - \$350.00

Fondant is a matte-smooth candy icing that gives your cake a smooth shell-like finish, creating a canvas for intricate embellishments. This sweet sugar dough is rolled out in thin sheets like cookie dough and wrapped around each layer on the cake. Because fondant-iced cakes are laborious they are subject to additional fees based on the elaborateness of the style and decoration of the cake.

- 3 layers – starting at \$900.00
- 4 layers – starting at \$1200.00

Tinted Icing most colors available - \$300 for 3-layer cake/\$350 for 4-layer cake.

Royal Icing is a combination of egg whites and sugar, piped and allowed to dry, becoming a hard finish; it's traditionally used to make leaves, flowers, lace and other edible decorations – not to cover the entire cake. Edible decorations price according to specific theme.

Sugarpaste or **Gumpaste**, a substance made of sugar, cornstarch and gelatin, produces those amazingly authentic-looking flowers, fruits and leaves, among other whimsical shapes. Unlike fondant, sugarpaste hardens after it dries. Edible decorations priced on request.

Molding Chocolate consists of corn syrup and chocolate, which is used by the pastry chef to shape accent pieces. Edible decorations priced according to a theme.

Our dessert selections contain allergens including tree nuts, peanuts, eggs, soy, milk, and wheat.
